

Athena

Athena is the first leather that merges today’s most innovative tanning technology with ALTA stain repellent technology. After years of development, Moore & Giles, applied: textiles and TENERIAS Omega in Spain were able to bring the same safe ALTA stain repellency science to leather that is found in many other fabric applications. Featuring a palette of this season’s most standout colors, ATHENA was created to offer all of the attributes of leather coupled with the peace of mind of ALTA technology to meet the demands of today’s modern lifestyles. ATHENA is smart, easy leather.
